

*Artist's impression of proposed spacial improvements*

*Photographs to illustrate existing issues*

**THE PRIOR FOUNDATION**  
An Education for Life

## *Facilities Fit for the 21st Century*

- **SOUND AND ACOUSTICS**  
*There are constant frustrations with the difficulty in hearing services and performances due to the poor sound system. New, state of the art audio provision and acoustic treatment will enable full enjoyment by all.*
- **NEW IMPROVED LIGHTING**  
*Lighting is poor, well below acceptable lux levels for reading and adds nothing to the ambience of the space. Effective and energy efficient lighting is required.*
- **REPLACEMENT PEWS AND FLEXIBLE SEATING**  
*The old pews are dilapidated and need regular repair. Flexible seating would accommodate large and small congregations and audiences comfortably, safely and more appropriately.*
- **REPAIRS TO DAMAGED FLOORING**  
*New and repaired flooring will help unify the space and allow pews to be positioned to suit the service or event.*
